College feedback analysis

2018-19

Qualitative Analysis of the feedback given by students/parents in written description.

- 1) Repetition of the same topics again and again sometimes saturates minds of the students which could be avoided.
- 2) There is a need to have more activity based class for monotonous topics. The students will be more interactive.
- 3) Marks should be given based on the efforts put in by the students for that particular assignment. Not in General.
